

ASHUTOSH PATHAK

Programme Director | Banking Technology Transformation

KEY ACHIEVEMENTS

Agentic AI Servicing Platform

Leading the move of a live journey of 730 client requests a day onto an AI enabled AWS platform at NatWest, phased by customer segment, targeting 70,000+ requests a month automated and a 50%+ cut in manual effort.

Engineering Velocity

Release cycle time cut from 22 days to under 12 through reusable GitLab CI/CD pipelines and a full Selenium BDD test suite, with releases moving to a fortnightly cadence.

First Blue Green Deployment at NatWest

Brought Blue Green deployment to the bank for the first time. Weekend releases gave way to on demand, zero downtime deployments with availability above 99%.

USD 60 Million Global Portfolio

Four concurrent regulatory programmes directed at Standard Chartered, risk rating 8.7 million clients across 17 markets and closing MAS, RBI and external audit findings.

PROGRAMME DIRECTOR | AI & DIGITAL TRANSFORMATION | BANKING TECHNOLOGY

London • +44 7765 720372 • ash.ashutoshpathak@gmail.com • [Portfolio](#) • [Linkedin](#)

SUMMARY

Programme director with 25 years in banking technology, currently leading client servicing transformation for NatWest Commercial & Institutional Banking. Runs five Agile teams, around 45 people, and owns the CTB budget, governance and delivery for a platform moving from conventional microservices onto an agentic AI architecture on AWS. Earlier work covers global KYC, credit risk and customer data programmes at Standard Chartered, DBS and Citi. AWS Certified AI Practitioner.

EXPERIENCE

Director / Programme Manager, Business & Technology Transformation

NatWest Group December 2023 to Present | London

- **5 Agile teams, around 45 people**, led across legacy and strategic servicing platforms, with three direct reports, one governance structure, a shared RAID log and a single dependency map.
- **730 requests a day** on the Mandates journey are moving onto Sirius Business Platform 2.0, an AI enabled platform on AWS, phased by customer segment so each release delivers on its own. In build and pilot, targeting a 50%+ cut in manual effort across a team of 73.
- **Agentic validation stack:** Amazon Bedrock AgentCore running a deterministic rules engine alongside LLM agents on Strands and Claude Sonnet, with document extraction and signature verification adopted as reusable AI services across the bank.
- **22 days to under 12:** release cycle time cut by directing reusable GitLab CI/CD pipelines and a Selenium BDD suite covering every servicing journey.
- **First Blue Green deployment at NatWest**, replacing weekend releases with on demand, zero downtime deployments and holding availability above 99%. Also directing the platform move from Pivotal Cloud Foundry to AWS.
- **Bank wide maturity frameworks** for Engineering, Quality and Operational Excellence written jointly with platform, SRE, QA and AI leads, covering DORA metrics, defect leakage, hotfix rate and security scanning across four tiers.
- **Planview owner since 2023** for all high and medium risks and issues on the platform, with weekly updates on mitigation steps, due dates and Red, Amber or Green status, tracked from L0 OKR items down to L1 work items.

Project Manager / Release Train Manager, Customer Identification Management

Tata Consultancy Services, NatWest C&I February 2022 to December 2023 | London

- **Unique Party IDs** delivered across source systems, bringing business, product, architecture, engineering and data teams together to clear long standing dependencies.
- **Release train governance** and sequencing across consuming systems, so downstream teams adopted new services without disrupting live processing.

Executive Director / Programme Manager, Technology & Innovation

Standard Chartered Bank May 2015 to February 2022 | Singapore

- **USD 60 million portfolio serving 20 million+ clients:** four concurrent programmes directed (Client Risk Assessment, Related Party Data, FATCA/CRS, ESG) with full ownership of budgets, vendor SOWs and funding priorities.
- **8.7 million clients** risk rated by the group wide AML and KYC risk engine, modernised onto OpenShift, Spring Boot and REST, with ICDD 2.0 rolled out across 17 markets.
- **25,000+ test scenarios** run on an Excel rules engine prototype built personally, modelling 25+ risk variables before development began.
- **MAS, RBI, EY, KPMG and Navigant** findings closed alongside internal audit across all four programmes.

Senior Business Analyst / Transformation Lead, Institutional Banking

DBS Bank February 2012 to May 2015 | Singapore

- **USD 7.5 million MAS aligned portfolio** across six Asian markets. Took the move from Foundation to Advanced Internal Ratings Based credit models through to go live and specified the OSCA credit rating platform.

Transformation Functional Lead, Global Customer Master Repository

Citibank October 2010 to January 2012 | Singapore

- **USD 30 million programme across 26 countries:** functional design of Citi's single golden customer record and its worldwide rollout.

Earlier Career

ABSA Bank | Citibank Nordics | Deutsche Bank | ICICI Bank | Standard Chartered May 2001 to August 2010 | Johannesburg, Stockholm, India

- **Core banking and digital servicing change** across Africa, the Nordics and India, including Flexcube re platforming and Nordic cards and lending.
